Index to Volume 19

Authors

A

Abbasi, S.A. 40
Anderson, Stanley E. 5

B

Berwanger, Patrick C. 166
Bhimavarapu, Kumar 19
Britton, Laurence G. 125, 140, 199

C

Carter, D.A. 78
Chaffee, Jeffrey L. 219
Chatrathi, Kris 146
Crowl, Daniel A. 112, 179

D

Dahn, C. James 86
Darby, Ron 32
Desai, U.R. 57

E

Erny, William J. 25

F

Falke, Ernest 98
Ferguson, Jeffrey S. 91

G

Garrett, Roger 98
Going, John 146

H

Haas, Paul 1
Hager, Guy 1
Harmanny, A. 74
Hendershot, Dennis C. 65, 91
Hirst, I.L. 78

J

Joshi, M.D. 57

K

Khan, Falsal I. 40
Kilpatrick, D.L. 210
Kreder, Robert A. 166
Kriegermeier, Corey W6
Kusmierz, Andrew 86

L

LaClair, Darcy W7
Lee, Wai-Shan 166
Leggett, David 13
Leonelli, Paolo 191
Lizhong, Yang 103
Lodal, Peter N. 154
Lu, Po-Yung 98

M

Mannan, M.S. 210
Mashuga, Chad V. 112

N

Ness, Albert I. 5

O

Ozog, Henry 25

Q

Qingan, Wang 103

R

Reyes, Bernadette N. 86
Robin, Mark L. 107
Roe, Donald L. 118
Rusch, George M. 98

S

Shonnard, David R. 179
Singh, Jagmohan 57
Singh, Jasbir 13
Singh, P.P. 69
Spadoni, Gigliola 191
Stark, Douglas E. 179
Stavrianidis, Paris 19

T

Tamanini, Francesco 219
Theré, Frank 74

Thibault, Paul 125
Tobin, Paul 98

V

Van Gelder, P. 74
van Wingerden, Kees 173
Verlicchi, Paola 191

W

Weicheng, Fan 103
Westfall-Lake, Peggy 9
Woodward, John 160

X

Xiaodong, Zhou 103

Z

Zhang, Fan 125

Titles

A

Accidental Releases of Two-Phase Multicomponent Critical Flow from Horizontal Pipes 191
Air and Refrigeration Machine Oil Console Fire, An ..69
Analysis Identifies Deficiencies in Existing Pressure Relief Systems 166

C

Case History: A Steam Line Rupture at Tennessee Eastman Division 154
Conduct of Operations: A Control Study for Your Most Important Safety Component 1

D

Deflagration and Detonation of Ethylene Oxide Vapor in Pipelines 125
Derivation of Le Chatelier's Mixing Rule for Flammable Limits 112
Development of Acute Exposure Guideline Levels for Hazardous Substances, The 98
Dust deflagration extinction 146

E

Encouraging Safety Awareness at the College Level..W7
Evaluation of Two-Phase Flow Models for Flashing Flow in Nozzles 32

F

Fire Protection in Telecommunication Facilities 107
Fire Protection Risk Assessment: A Proposed Methodology for Oil and Chemical Facilities 118

H

Human Factors: Preventing Catastrophic Human Error in 24-Hour Operations 9

I

Impact of Toxicity Dose-Response Relationships on Quantitative Risk Analysis Results, The 91
Importance of Process Safety Instruction in Undergraduate Chemical Engineering Curriculum W6

M

Methodology to Evaluate Industrial Vapor and Dust Explosion Hazards, A 86
Mitigation of Gas Explosion Using Water Deluge 173
Mixture Reactivity in Explosions of Stratified Fuel/Air Layers 219
Model of Indoor Releases with Recirculating Ventilation, A 160

N

Natural Gas Feed Preheater Fire, A 57
New Approach to Explosion Suppression, A 74

P

Process Improvements from Incident Data 13
Pros and Cons of Shelter-in-Place, The 210

S

Safety Aspects During Transient and Steady-State Operation of a Pilot-Scale Distillation Column 179
Safety Hazards Associated with Air-Emission Controls 25
Safety Integrity Level Analysis for Processes: Issues and Methodologies 19
Studies on the Probabilities and Likely Impacts of Chains of Accident (Domino Effect) in a Fertilizer Industry 40
Study on Detonation Safety of Some Hydrocarbon-Air Mixtures, A 103

U

Use of Propylene Oxide Versus Nitrogen as an Ethylene Oxide Diluent 199
Using Maximum Experimental Safe Gap to Select Flame Arresters 140

W

Was Murphy Wrong? Murphy's Law in Operation and Design of Chemical Plants 65
When You Cut Down a Tree, Keep an Eye on the Forest 5
"Worst Case" Methodology for Risk Assessment of Major Accident Installations, A 78

Subjects

A

Accidental releases 191
Air and machine oil fire 69
Air emission controls 25
Analysis of pressure relief systems....166

C

Case history, steam line rupture....152
Chans of accident in fertilizer industry 40
Control study, operations 1

D

Deflagration and detonation of vapor 125
Design of chemical plants 65
Detonation safety of hydrocarbon-air mixtures....103
Development of Exposure Guideline Levels 98
Distillation column safety 179
Domino effect 40
Dust
  deflagration 146
  explosion hazards....86

E

Education W6, W7
Evaluation of two-phase flow models 32
Evaluating vapor and dust explosions....86
Explosion
  gas explosion 173
  mitigation using water deluge 173
  of stratified fuel/air layers 219
  suppression....74
  vapor and dust explosion hazards 86
Exposure guidelines for hazardous substances....98

F

Fertilizer industry 40
Fire, machine oil 69
Fire protection
  in telecommunication facilities 107
  natural gas feed preheater 57
  risk assessment for oil and chemical facilities 118
Flame Arresters 140
Flammable limits 112
Flashing flow in nozzles....32

H

Hazardous substance guidelines 98
Hazards with air emission controls 25
Human factors....9
Hydrocarbon-air mixture safety 103

I

Indoor releases with recirculating ventilation 160
Instruction in undergraduate curriculum W4

M

Methodology to evaluate explosion hazards....86
Mitigation of gas explosion 173
Mixing rule 112
Mixture reactivity in stratified fuel/air layers....219
Model of indoor releases 160

N

Natural gas feed preheater fire....57
Nitrogen as ethylene oxide diluent 199

O

Operations, control study 1

P

Pilot-scale distillation column....179
Pipelines/pipes
  releases from....191
  deflagration and detonation of vapor in 125
Pressure relief systems 166
Preventing human error 9
Process improvements 13
Process safety instruction W7
Propylene oxide as ethylene oxide diluent....199

Q

Quantitative risk analysis results 91

R

Reactivity in stratified fuel/air layers 219
Recirculating ventilation, ...160

Risk assessment
for oil and chemical facilities 118
of major accident installations 78

S

SACHE papers W6, W7
Safety
during operation of distillation column 179
hazards with air emission controls 25
in operations 1
instruction at college level W6, W7
integrity level analysis for processes 19
of hydrocarbon-air mixtures 103
Shelter-in-place 210
Steam line rupture 154

T

Telecommunication facilities 107
Toxicity dose-response 91
Two-phase flow 32, 191

U

Undergraduate chemical engineering
curriculum W6, W7
Using water deluge to mitigate explosion 173

W

Water deluge to mitigate gas explosion 173
"Worst case" methodology for risk assessment 78

Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of October 11, 2000, for *Process Safety Progress* Publication No. 689-410, issued quarterly for an annual subscription price of $245 from AIChE, 3 Park Avenue, New York, NY 10016-5991, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Stephen R. Smith, 3 Park Avenue, New York, NY 10016-5991; Editor, T.A. Ventrone, 3 Park Avenue, New York, NY 10016-5991; Managing Editor, Lois Anne DeLong, 3 Park Avenue, New York, N.Y. 10016-5991. The owner is: American Institute of Chemical Engineers, 3 Park Avenue, New York, N.Y. 10016-5991. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purpose have not changed during the preceding 12 months. The following figures describe the nature and extent of *Process Safety Progress*' circulation. In each category the first number (*in italics*) is the average number of copies of each issue during the preceding 12 months. The number next to it, within parentheses ( ), is the actual number of copies of the single issue published nearest to the filing date.

A. Total number of copies printed (net press run), *2,475* (2,400).
B. Paid and/or requested circulation: [1] Paid/requested outside-county mail subscription stated on form 3541: *2,013* (1,940). [2] Paid in-county subscriptions stated on form 3541: None. [3] Sales through dealers and carriers, street vendors, counter sales, and other non-USPS paid distribution: None. [4] Other classes mailed through the USPS: None.
C. Total paid and/or requested circulation *2,013* (1940).
D. Free distribution by mail: None. [1] Outside-county as stated on form 3541: *15* (15). [2] In-county as stated on form 3541: None. [3] Other classes through USPS: None.
F. Total free distribution: *15* (15).
G. Total distribution: *2028* (1955).
H. Copies not distributed: *447* (445).
I. Total: *2,475* (2,400).
J. Percent paid and/or requested circulation *99.26* (99.23).

I certify that the statements made by me are correct and complete.
Stephen R. Smith, Senior Director, Publications.
